**Specialised
consultants**

To assist you place your products on
the market in an efficient way

We can help you

- Establish a business presence in one of the EU countries
- Gather marketing information or better understand current legislation
- Make an application or variation (National, MRP or Centralised)
- Produce a technology assessment for a pricing application
- Produce medical documents, clinical reports

A small consultancy offering specialized services in Europe

Pharma Design can assist your company in developing the right strategy to market your products in a cost-efficient way.

It has taken several years of hard work to gather the right consultants so that we could offer to our clients practical advice on how to establish a fruitful presence in the EU market.

The simple company structure allows for reduced cost and time. The easy access to our consultants provides you with a flexible solution, as we know that your needs may change quickly.
